

Service Inspection Certification

City Of Palmer

Location of Service _____

I, _____ upon inspection of the private plumbing facilities connected to the aforementioned public water supply do hereby certify that, to the best of my knowledge:

- | | Compliance | Non-compliance |
|---|------------|----------------|
| (1) No direct connection between the public drinking water supply and a potential source of contamination exists. Potential Sources of contamination are isolated from the public water system by an air gap or an appropriate backflow prevention assembly in accordance with state plumbing regulations. Additionally, all pressure relief valves and thermal expansion devices are in compliance with state plumbing codes | — | — |
| (2) No cross connection between the public drinking water supply and a private water system exists. Where an actual air gap is not maintained between the public water supply and a private water supply, an approved reduced pressure zone backflow prevention assembly is promptly installed and a service agreement exists for annual inspection and testing by a certified backflow prevention device tester. | — | — |
| (3) No connection exists which should allow the return of water used for condensing, cooling or industrial processes back to the public water supply. | — | — |
| (4) No pipe or pipe fitting which contains more than 8.0% lead exists in private plumbing facilities installed on or after July 1, 1988. | — | — |
| (5) No solder or flux which contains more than 0.2% lead exists in private plumbing facilities installed on or after July 1, 1988. | — | — |
| (6) No plumbing fixture is installed which is not in compliance with a state approved plumbing code. | — | — |

Water service shall not be provided or restored to the private plumbing facilities until the above conditions are determined to be in compliance.
